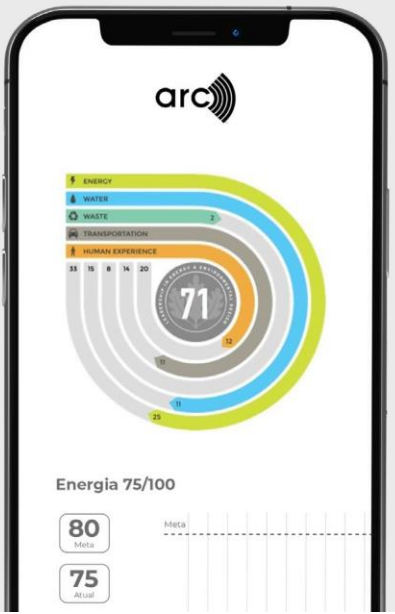
CORTEX

Arc GBC

Integration with the Arc GBC tool for the topics of energy, water, waste, human experience and transportation. Send data from the CORTEX platform directly to the GBC Brazil database. Benchmark with Arc GBC data directly on the CORTEX platform.



Artificial Intelligence

Application of layers of artificial intelligence to aid infrastructure management. Visualize general trends in a simple and intuitive way using graphical data and management dashboards.

Integrations

Simple integration with existing automation and measurement systems. Connect your building's sensors to the CORTEX platform now. Have all your building data centralized in one single place.

Bills

Bill reading system exclusive to the CORTEX platform, designed to simplify filling in the consumption history of buildings managed by this solution. Using a smartphone, photograph and transfer consumption data to the platform.
